

4. What is a "BASE LEVEL"?

Base Levels:

A student learns the majority of the dance styles they know at essentially the same level.

For Example : Beginner Dancer, Advanced Beginner Dancer, Intermediate Dancer, Bronze 1 Dancer, Silver 2 Dancer, etc.

These are the student's "Major Dance Styles".

Many students choose to learn 1 or more extra dance styles "occasionally" or "started later" so the progress is generally behind their Major Dance Styles to a lesser or greater extent.

The dancer will not be a "true beginner" in these newer dance styles as they will apply their current movement abilities and knowledge to the newer styles.

These are the student's "Minor Dance Styles".

The Level of a Student's "Major Dance Styles" is their "Base Level".

Your Entry Form asks you to fill in the student's "Major Dance Styles" and the "Base Level" they are currently dancing them in their lessons.

"Minor Dance Styles" can only be entered 1 Level lower than their "Base Level" if you feel it is more fair for your student.

Now you can enter your student into all their Major Dances at their Base Level and up to 2 Levels higher. And you can enter whichever other minor dances your student wants, at 1 Level lower and also up to 2 Levels higher as well.

ASDAC works on the honesty system.

The fair Entry Level for the current learning of your student is also fair for the other competitors entering that Level too.

We thank you for your honesty.
